Coconut Shell Activated Carbon

Gold Recovery Grade Activated Carbon

RFQ ID: RFQ-2026-GC112	Application: Gold Recovery (CIP / CIL / CIC)
Date: 22 Aug 2026	Total Quantity: 112 MT
Product: Coconut Shell Activated Carbon	Container Requirement: 4 × 40' HQ FCL (28 MT/FCL)

1. Primary Material Specifications

Parameter	Required Specification	Testing Standard / Reference
Base Raw Material	100% Virgin Coconut Shell	High Micro-porosity Origin
Mesh Size	6 × 12 Mesh (1.70 mm – 3.35 mm)	ASTM D2862
Iodine Number	Minimum 1100 mg/g	ASTM D4607
Moisture Content	Maximum 5.0%	ASTM D2867
Fixed Carbon Content	Minimum 90.0%	Proximate Analysis
Ash Content	Maximum 3.0%	ASTM D2866

2. Quality & Mechanical Expectations

Parameter	Required Specification
Hardness / Abrasion (ASTM D3802)	Min 98%
Platelet Content	Max 2%
Gold Kinetic Rate (R-value)	Min 55%
Gold Loading Capacity (K-value)	Min 25 kg Au/ton

3. Packaging & Shipping Terms

Parameter	Required Specification / Condition
Bag Unit	25 KG PP woven bags with internal PE moisture-barrier liners
Total Quantity	4,480 bags
Container Distribution	1,120 bags per 40' HQ container
Palletization	ISPM-15 compliant heat-treated wooden/plastic pallets, stretch-wrapped
Markings	Product Name, Mesh Size, Batch No., Net Weight, and Gross Weight per bag

4. Quotation Submission Requirements

Vendors must submit a formal commercial quotation based on FOB primary shipping port and CIF destination terms, including:

- Comprehensive Certificate of Analysis (COA) for the specified Iodine 1100+ / 6×12 grade
- Lead time for the total 112 MT shipment
- 4 × 40' HQ container shipment capability
- Quotation validity period
- Payment terms
